

February 2017

Dear Parent/Carer

Your child is studying GCSE resistant materials and, as part of the course, they must complete a practical project for their controlled assessment. This consists of designing and manufacturing a product. In order to allow us to create the practical work for the project the school is asking for a contribution towards the costs of materials. This will allow your child to take home their work once it has been manufactured and assessed. If the contribution is not made, the student will not be able to take their work home and may be limited in what they can manufacture, as the school will need to recycle the materials once the project is complete and assessed.

We have calculated each contribution that we have requested after considering the materials that your child has decided to use for their project.

The contribution the school is asking for project is £.....

Please complete, sign and return the slip below, along with your contribution, to Student Reception.

Please do not hesitate to contact me if you have any questions or concerns regarding this.

Yours sincerely

Ben Lowe
Resistant Materials Teacher

✂.....

Please return to Student Reception – resistant materials contribution

Name of student

TG

I enclose a contribution of £

Signed
